post **sugaring** advice for salons

1. Keep the treated area cool immediately after treatment using Phâro Après Sugaring Hydrating Mist if needed.
2. Keep the skin cool and avoid tight fitting clothes.
3. Do not sunbathe, or use a sunbed, sauna, steam room or shower for 24 hours after treatment.
4. Avoid any heat or friction to the skin.
5. Do not take part in any exercise or gym classes, and do not massage the area for 24 hours.
6. Do not have a hot bath, spa, or swim in chlorinated water for 24 hours.
7. Do not apply perfumed products to the area, sprays or deodorants for 24 hours.
8. It is important to apply sun block daily for 2 to 3 days following your treatment, this helps with the healing process.
9. It is important to exfoliate once or twice a week, this helps with the prevention of ingrowing hairs.
10. Follow the advice from your therapist at all times.

NOTE:

Hives can also occur if the client is allergic to any of the ingredients.

Clients who develop histamine bumps can take an antihistamine if they choose, but this must not be supplied by the therapist.

For areas that look particularly tender, a cool compress can be made by soaking a clean towel in a solution of water and baking soda, this compress can be applied to the area for 10 minutes.
